QTY. 1**

**SELF-TAPPING  
SCREWS  
P/N 900057-5  
QTY. 2**

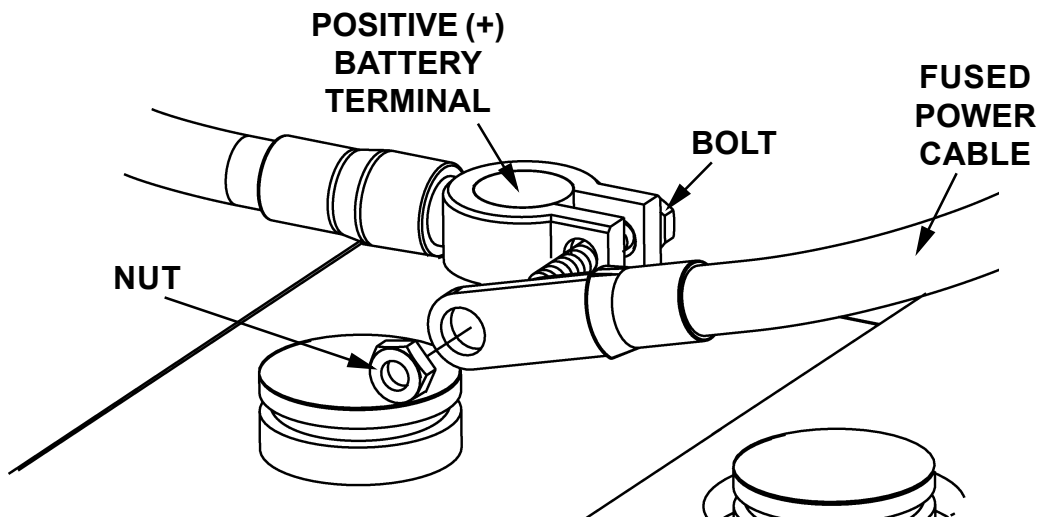

**PLASTIC TIE  
7" (50 LB)  
P/N 205780  
QTY. 1**

1. **LOWER** Liftgate to the ground (**FIG. 1A**). Remove nut from positive (+) battery terminal connector to disconnect Power Cable (**FIG. 1B**).

**FIG. 1A**

**FIG. 1B**

2. Drill one 3/4" hole and two #21-size holes as shown in FIG. 2.

**NOTE:** Liftgate must be lowered to the ground to gain access to underside of truck.

**⚠ CAUTION**

Always route electrical wires clear of moving parts, brake lines, sharp edges and exhaust systems. Avoid making sharp bends in wiring. Attach securely. If drilling is necessary, first check behind the drilling surface so you do not damage any fuel lines, vent lines, brake lines or wires.

3. Disconnect Interconnect Wiring Harness from Control Box, connect Street Side Control Tee and route wiring from the Street Side Control Tee to street side of vehicle as shown in **FIG. 3**.

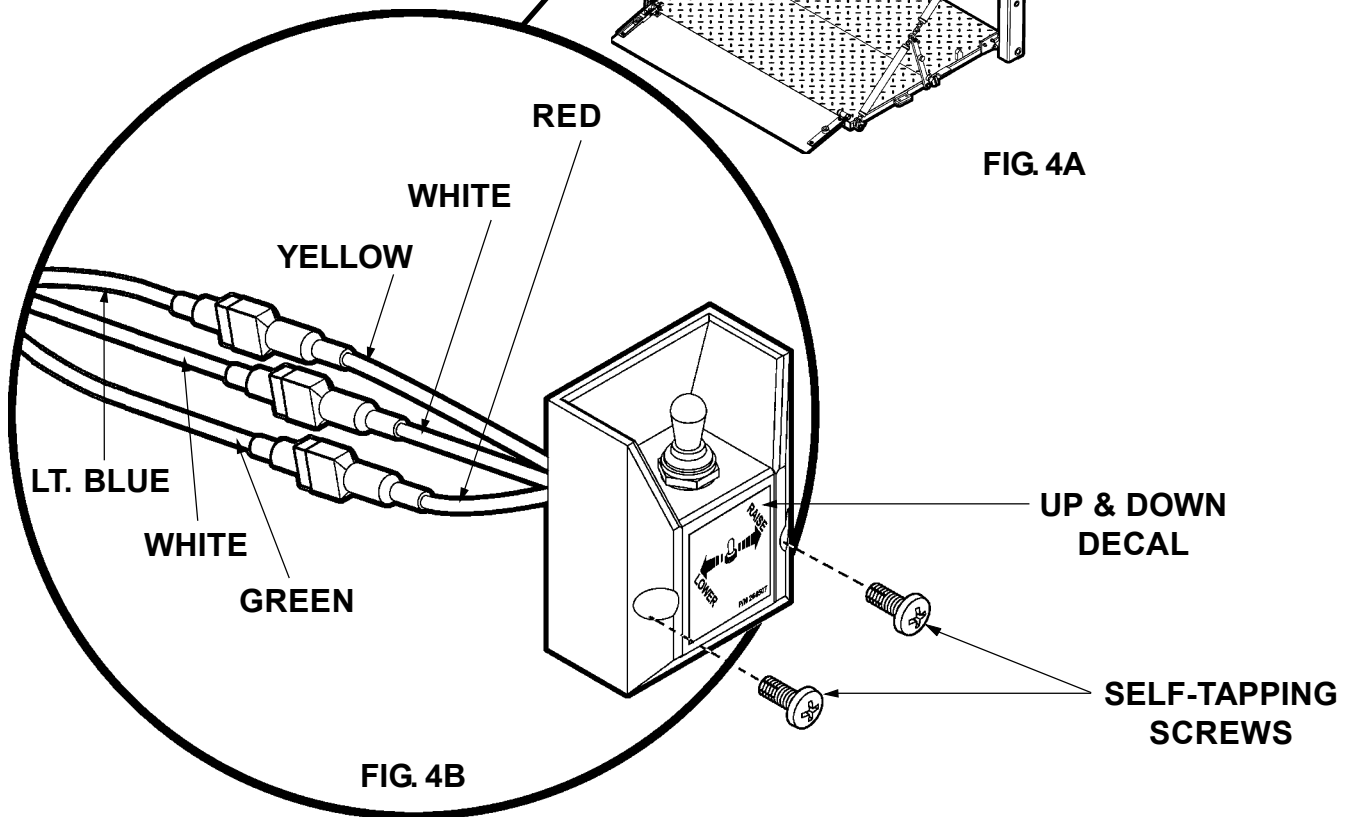

**FIG. 3**

4. Route Street Side Control Tee wiring harness up through inside vertical post on vehicle body and out the 3/4" hole (drilled in previous step) as shown in **FIG. 4A**. Connect Switch Control wiring to the Tee wiring harness as shown in (**FIG. 4B**). Push extended wiring back into the 3/4" hole in the vertical post until Switch Control touches the post. Fasten the Switch Control to vertical post with 2 self-tapping screws. Place **UP & DOWN** decal on Switch Control as shown in **FIG. 4B**.

**FIG. 4A**

**FIG. 4B**

5. Remove nut from positive (+) battery terminal connector (**FIG. 5A**). Reconnect Power Cable to the positive (+) battery terminal connector and tighten nut. To verify new Street Side Control Switch operates correctly, push Control Switch (**FIG. 5B**) to **LOWER** Liftgate. Release Control Switch and then push switch to **RAISE** the Liftgate as shown in **FIG. 5C**.
