

TUK-A-WAY® SERIES

The TE-33 Series

MAXON®

TE-33 SPECIFICATIONS

MAXON's TE-33 liftgate model has taken "standard" to a whole new level. The 3,300 lb, medium-duty, Tuk-A-Way® delivers premium features in a standard tuk.

- Steel or Aluminum platforms
- SmartSpace™ - gap between extension plate and platform that mitigates a potential pinch point
- Bolted-on extension plate and steps
- Hydraulic locking
- Grease fittings at all critical rotation points
- Low bed height as well as walk ramp ready models available

MAXON®

Optional Features

- Hand held control
- MAX ECU® (Electrical Control Unit)
- Cab Cut-off
- Power down
- Single or Dual Cart stops
- Galvanized finish

Loadable Platform Space with Cart Stops Deployed

Large Wedge-Type Platform Design

The TE-33 features large 48" x 84" and 52" x 84" wedge-type steel or aluminum/aluminum platforms. The AL/AL platforms come optional with single or dual cart stops. The wedge design allows smooth transition of load on and off the platform.

Twin Cylinder Design

The TE-33 features a twin cylinder, mid-arm design resulting in great performance and stability.

Hydraulic Locking

The TE-33 features a hydraulic lock valve that takes operator involvement out of the equation. As soon as the control button is released the gate is always securely locked.

Bolt-On Steps & Extension Plate

The steps and extension plates were strategically designed to bolt-on in order to avoid welding on the gate that would affect the factory paint. The steps were also designed as an integral part of the gate that would easily allow for them to be exchanged in case of dock damage.

MAXPRO® Paint or GALVANIZED Finish

This patented, Maxon exclusive paint process has a tough polyurea top coat and an AL rich primer that combat corrosion and keep the liftgate looking like new. For even more corrosion protection, the TE-33 is also available in a galvanized finish.
