

## SPECIFICATIONS

Maxon's MAX LINK™ takes liftgate performance to a new standard. Adding connectivity to a liftgate, MAX LINK™ identifies any liftgate status issues that may arise before they cause needless downtime. Get real-time notifications directly via our app.

- Maximize up time
- Reduce cost of ownership (Maximize value)
- System identifies failures patterns and maintenance items allowing for predictive maintenance
- System can be remotely monitored through a Telematic service provider

### Accessibility to Data

- Locally at liftgate with smart device (Android or IOS)
- Hardware or wireless interface to Telematic provider's system

### Data Privacy

- Customer controls data
- MAX LINK™ analyzes data to identify any issues before they cause downtime and sends notification that preventive maintenance is needed

### Common Data Requested

- Liftgate cycle count
- Motor run hours (Motor life)
- Charging system status
- Battery status (SOC)
- Code/messaging for Maintenance/System issues

M-237-0119

## Because information is king.

Connect your Maxon® liftgate to most Telematic systems.

Maxon's MAX LINK™ takes liftgate performance to a new standard. MAX LINK™ adds connectivity to a liftgate. Connectable to most Telematic systems, MAX LINK™ identifies liftgate status and problems before they cause needless downtime. Get real-time notifications sent to your back office or access liftgate data directly via our app. Maximize uptime with MAX LINK™.

To get better connected and maximize liftgate uptime, call (800) 227-4116 or visit [www.maxonlift.com](http://www.maxonlift.com) today.
