ANNOUNCEMENT

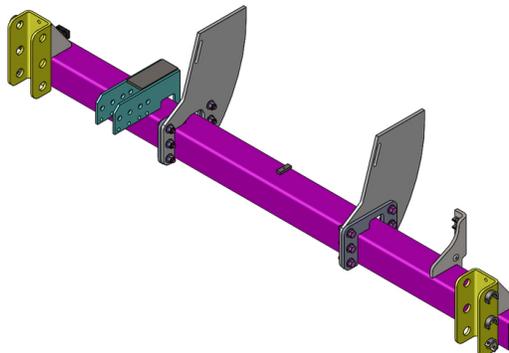

Product Update: MAXON's Premium Tuk-A-Way® Liftgates GPT/GPTWR & GPTLR - GALVANIZED Standard starting September 2017!

As you may already know, Maxon's newly-built, state-of-the-art galvanizing plant is now in operation. With all of our galvanizing being done in-house, Maxon is pleased to offer our customers galvanization as a *standard* on all GPT/GPTWR and GPTLR gates. Pricing is the same you just get more for your dollar!

Note: requests for painted GPT/GPTWR/GPTLR gates will require an SOR (special order request). At this point in time, build slots for painted GPT's and GPTLR's are now gone and every new order that requests a painted gate needs to go through the SOR process.

Additionally, in order to allow the welding of the mount plates to the chassis (without welding galvanized material), the GPT/GPTWR and GPTLR will feature painted mount plates that are bolted to the main frame tube.
