

MAXON Product Highlight: All New Low-Bed Height MXT Tuk-A-Way®Liftgate

Maxon is pleased to announce the newest addition to our already industry leading product line – the MXT-25 / -33. Combining low bed height application with a premium level-ramping ride design, the MXT features a twin cylinder, mid-arm design that results in great performance and stability. MXT models are available in low bed height ranges of 38” to 46”. With 2,500 lbs. (MXT-25) and 3,300 lbs. (MXT-33) for lifting capacities, the MXT models were strategically built to suit the need for low bed height chassis. “Maxon was founded on the invention of the Tuk-A-Way® liftgate. The MXT is another extension of this heritage of innovation. For instance, the new MXT knuckling mechanism was designed to work in gravity mode for ultimate power consumption efficiency”, says Brent Stratton (Office of the President).

The MXT models feature a 48” x 80” wedge-type Steel, Steel/Aluminum as well as all-Aluminum platform with optional dual cart stops. Standard features include a bolt-on extension plate and steps, hydraulic locking, grease fittings at all critical rotation points and all steel components come hot-dip galvanized - **STANDARD**.

Sample optional features include: hand-held control, dual controls, cab cut-off switch, MAX ECU Electrical Control Unit, power down, dual cart stops, multiple step options, license plate mount kit and 24 Volt configurations.
