

## Upgrade Your Fleet with Merlin Solar

Field tests have clearly shown the effectiveness of Merlin Solar to keep auxiliary liftgate batteries charged. The business case does not only involve less downtime and less component damage due to avoiding low voltage situations but also prolonged battery life of the auxiliary battery pack.

With everything being in short supply these days, Maxon is pleased to have Merlin Panels ready for immediate shipment. **Now through the end of September 2022, Merlin Panels can be purchased to retrofit fleets at the same price as these are usually only sold with a Maxon liftgate.**
