	1993 - 1999	T-100	NO ³
	2007 - 2019	TUNDRA Fullsize 1/2 Ton	NO ³

NOTES:

1. When mounting a C2-Series liftgate on a 2011-2014 Chevy/GMC 2500 or 3500, the liftgate is installed rearward to accommodate the factory hitch. This results in a space between the liftgate mainframe and truck bed. A filler strip may be needed (not included).
2. Application on a 2017-2018 Ford Superduty positions the liftgate up to 5 inches rearward to accommodate the factory hitch. A filler strip is included in the mounting kit to bridge the gap.
3. Contact ACME Hitch (www.acmehitch.com) for an after-market hitch solution at (800) 821-7576 or e-mail steve@acmehitch.com
