	1993 - 1998	T-100	NO
	2007 - 2020	TUNDRA Fullsize 1/2 Ton	NO

NOTES:

A. In 2007 Chevy/ GMC produced two body styles. The “old” style is the same as 2006 and is labeled “Classic”. The “new” style does not have the “Classic” label.

1. Does not include: 2007 GM “Classic” pickups.
2. When mounting a C2 Series liftgate on a 2011-2014 model year Chevy/GMC 2500/3500 pickup, the liftgate will need to be positioned 1/2” to 1” rearward to avoid the factory hitch. A filler strip may be needed to fill the gap (not included in the mounting kit).
3. This application positions the liftgate up to 5” rearward to accommodate the factory hitch. A filler strip is included in the mounting kit to bridge the gap.

Contact ACME Hitch (www.acmehitch.com) for an after-market hitch solution at (800) 821-7576 or e-mail steve@acmehitch.com
